

EMERGENCY MANAGEMENT

FOR SCHOOLS

WebQuest Teacher Information

This WebQuest is aimed at Year 5/6 and Year 7/8 students but could easily be modified to the needs of latter years. It focuses on the curriculum area of Geography but also has many aspects relevant to other curriculum areas such as English, Maths, ICT, Science and The Arts.

Teachers will need to ensure that they have:

- viewed the entire WebQuest prior to starting it with their class
- filled in the allocated time for each stage of the tasks on student's work plan and printed off enough copies for students
- conducted a lesson with students on how to conduct effective research and how to reference materials used
- talked to students about natural disasters and the ramifications of such events, and
- discussed with students their expectations of working in groups and both the self assessment and teacher assessment rubric.
