Author : Esquivie, Jean-Louis
Wybo, Jean-Luc

Title : **11/9 : a historical perspective.**

Publication : 2003.

Citation: International Journal of Emergency Management, Vol.1(3) 2003, pp.290-297.

Summary: This paper presents some key elements about the origins of modern terrorism that help to understand the terrorist attacks against the twin towers in New York and the Pentagon in Washington, on September 11, 2001. Initially associated with the struggle against tyrants, terrorist action has been used to support different causes, which have in common the battle against current authority.

DVD5308.
Region 4, PAL.
Subtitles: English for the hearing impaired.
"The filmmakers' commemorative DVD edition." - container.

Credits: Produced/edited by Richard Barber, Mike Maloy, Bruce Spiegel, Mead Stone ; directed by Jules Naudet, Gedeon Naudet, James Hanlon

Summary: This documentary focuses on the firefighters who went into the heart of what would be known as Ground Zero. Jules Naudet also managed to film the only existing image of the first plane crashing into the World Trade Centre. On the morning of September 11, 2001, brothers Jules and Gedeon Naudet were working on a documentary about a rookie New York City firefighter. As a result of this, they were accompanying Engine 7, Ladder 1 when it responded to the World Trade Centre attack. This contains the only known footage of what happened inside Tower 1. DVD.

Title : **Aftermath : unseen 9/11 photos by a New York City cop / John Botte.**

: 1st ed.

Publication : New York : Regan Books, 2006.

Physical Description: 211 p. :ill. ;31 cm.

Summary: "On the fifth anniversary of the attacks of September 11, 2001, former NYPD detective and lifelong photographer John Botte unveils his powerful, penetrating portraits of America's unforgettable tragedy. Asked by the police commissioner to document the aftermath, Botte spent countless hours at Ground Zero in the moments, days, and weeks following the attacks, and was given privileged access to the behind-the-scenes rescue and recovery efforts of 9/11... With more than one hundred and thirty hand-developed, black-and-white photos and selected captions by the photographer himself, the book memorializes the unforgettable images we all recall from those days and captures countless scenes previously known only to those who worked the devastated area so tirelessly. The result is an extraordinary historical record that stands to become the definitive photographic retrospective of September 11." -- BOOK JACKET

Publication : 2002.

SEPTEMBER 11 TERRORIST ATTACKS

Citation: National Emergency Response, Vol. 12 (2), April 2002, pp. 32-36.

Summary: The events of September 11 have been reported and analysed endlessly by the media, but two little understood or widely reported events involving 1.2 million people caught up in the aftermath are now only beginning to be factually described. One involved a low key mutual help operation seemingly entirely planned and executed by a handful of ferry boat operators, aided by private boat owners, the other a massively more high tech operation involving the passenger aircraft still in the air after the planes crashed into the US buildings. This operation quickly extended from Russia to the southern US over "the top" and via the North Atlantic, and via a knock on effect to places far more distant.

Title : **Helping the other victims of September 11 : Gander uses multiple EOCs to deal with 38 diverted flights.**

Publication : 2002.

SEPTEMBER 11 TERRORIST ATTACKS

Citation: International Journal of Mass Emergencies and Disasters, Vol.20 No.3, November 2002, pp. 369-398
Australian Journal of Emergency Management, Vol.18 No.2, May 2003, pp.108-122.

Summary: On September 11, 2001, U.S. registered aircraft were redirected to other airports. Most needed a North American airport, and that airport had to be Canada. On the East Coast, two factors affected where jets landed, the jet stream and the weather. This article is about how Gander handled that situation. As will be shown, the community activated a number of emergency operations centers (EOCs) and each ended up managing one aspect of the response. Though the airport was the key, the result was a coordinated system that ran smoothly without any single agency taking charge. This article describes how that system came about, why it worked and how Gander avoided problems that often occur with multiple EOCs and emergent groups.

Title : **Investigating the disaster in New York City : conducting field research following the collapse of the World Trade Center**

Publication : 2002

Citation: Natural Hazards Review, Vol. 3 (2), May 2002, pp. 34-35

Summary: The terrorist acts of September 11, 2001, created a unique opportunity for those engaged in disaster research. Within days of the collapse of the World Trade Center towers and the attack on the Pentagon, the "Quick Response" (QR) research grant program, funded by the National Science Foundation (NSF) and administered by the Natural Hazards Research and Applications Information Center at the University of Colorado, Boulder, was supplemented with additional funds to allow hazard researchers the opportunity to gain rapid access to the location of the incidents. The research objective was to document the initial social and organizational processes involved in the management of victim identification following the collapse of the World Trade Center towers.

Title : **National security and emergency management after September 11. [article]**

Publication : 2005.

Citation: International Journal of Mass Emergencies and Disasters, Vol.23 No.3 2005, pp. 5-26.

Summary: The terrorist attacks in New York on September 11 2001 have troubled the practice of security. There has been renewed emphasis on the need for a layered security strategy, and this has refocused attention on civil defense. As a consequence, emergency management institutions are increasingly being incorporated under the aegis of national security. This is resulting in the implementation of older command-and-control type models of emergency management at the expense of the prevention-oriented, preparedness and community based approaches that emerged after the end of the Cold War. The paper situates this recent convergence of security and emergency management in a discussion of the evolution of both policy fields since the end of WWII. It then explains the post-September 11 trend towards centralizing authority in emergency management in Australia, but with considerable reference to parallel developments in the United States. The paper argues that while this retrogressive shift seems inimical to contemporary advances in emergency management, an inclusive interpretation of security as human security could serve to reinforce the important developments made in the field of emergency management in the last decade

Title : **Report from ground zero /Dennis Smith.**

Publication : Camberwell, Vic. : Penguin Books, 2003.

Physical Description: x, 377 p., [16] p. of plates :ill., map ;20 cm.

Note : Previously published: Ringwood, Vic. : Viking, 2002.
This edition includes an additional afterword from the author.

Summary: The tragic events of September 11, 2001, forever altered the American landscape, both literally and figuratively. Immediately after the jets struck the twin towers of the World Trade Centre, Dennis Smith, a former firefighter, reported to Manhattan's Ladder Co. 16 to volunteer in the rescue efforts. In the weeks that followed, Smith was present on the front lines, attending to the wounded, sifting through the wreckage and mourning with New York's devastated fire and police departments. Written with drama and urgency, Report from Ground Zero honours the men and women who - in America's darkest hours - redefined our understanding of courage- [from cover]

Title : **The secret history of 9/11 : based on the findings of the 9/11 commission [videorecording].**

Publication : [Australia] : CBC Documentary Unit :SIREN [distributor], 2006.

Physical Description: 1 videodisc (DVD) (120 min.) :sd., col. ;4 3/4 in.

Note : Censorship classification: PG.

Credits: Featuring White House advisor Richard Clarke

Summary: To mark the fifth anniversary of the September 11, 2001 attacks on the United States, the CBC presents a two hour documentary The Secret History of 9/11. The extraordinary tale of intrigue and espionage begins with the first attack on the World Trade Center in 1993. The Secret History of 9/11 provides a look at the long, secret war waged against Al Qaeda from the White House, the CIA and FBI, and examines the key intelligence failures that allowed the 9/11 plot to happen. Interviews include Richard Clarke (Chief of Counter Terrorism at the White House) Mike Scheuer (The head of the CIA Bin Laden Unit) and Gary Schroen (the CIA field agent who was trying to capture or kill Osama Bin Laden throughout the 1990's). Watch a riveting minute-by-minute account of what was going on behind the scenes on 9/11. There was confusion in air traffic control, a failure to promptly notify the military about hijacked planes, and a breakdown in communications around the President. George W.Bush was reduced to trying to contact Washington on a borrowed cell phone. The presidential order to shoot down any further hijacked airliners never reached the fighter pilots who could have carried out the order.

Title : **The terrorist attacks on September 11, 2001 : : immediate impacts and their ramifications for federal emergency management / Claire B. Rubin and Irmak Renda-Tanali**

Publication : Boulder, Colo. : University of Colorado, 2001

Physical Description: 14 p.

Series: Quick response report ;#140

Note : Cover title
Spiral bound
This material is based upon work supported by the National Science Foundation under Grant No. CMS-0080977

Summary: In researching and documenting the outcomes of the events in New York City and the Pentagon, the authors chose to focus primarily on emergency management at the federal level. Even with this limited focus, the effects of the September 11 events on the federal government involves a huge array of impacts and outcomes. This report will briefly describe the events and their effects, giving more time and space to some of the early impacts and ramifications. The report deals generally with emergency management issues and actions during the first 30 days after September 11. It does not cover the many problems and issues connected with the public management of health and environmental issues that began to emerge about four weeks after the attacks took place. Finally, the research relied mainly on secondary sources, because it was not possible to gain access to key actors for personal interviews in the first few weeks after the massive event.
